Status and management of the EAAFP Flyway Site Network：
EAAFP Secretariat recommends

- **Maintain Updated Site Information**

Partners are encouraged to keep Site Information Sheets for all Flyway Network Sites current, including the latest data on migratory waterbird populations, habitats, and their role in ecological connectivity across the Flyway.

- **Promote and Use the Sister Site Mechanism**

Partners, particularly National Focal Points, are encouraged to strengthen ecological linkages for migratory waterbirds and foster social and institutional connections among site managers, communities, and stakeholders through the Sister Site mechanism.

- **Expand and Strengthen Connectivity**

Partners are encouraged to establish new Sister Sites and participate in cooperative initiatives that enhance integrated connectivity, ecological, social, and institutional, and in this way support coordinated conservation outcomes across the Flyway.
